

# FCSvr 101: Introduction to Administering Final Cut Server

Authorized  
Training Center

College of MultiMedia

## Course Description

This two-day class guides you through administering Final Cut Server, Apple's powerful new media asset management and workflow automation software. Final Cut Server takes the headache out of managing large collections of media files, then extends to tracking job status, managing reviews and approvals, and automating complex sequences of tasks all in a single product designed to work seamlessly with Final Cut Studio. The course combines of lectures and hands-on case study exercises to provide practical real-world experience.

## Who Should Attend

This course is designed to provide the necessary skills, tools, and knowledge to those who are responsible for implementing and maintaining Final Cut Server systems. It is appropriate for system administrators, technical coordinators, resellers, Apple field employees working with Pro Apps, and technicians working in a post house, studio, or other large facility. This course can also be taken by an end users of Final Cut Server.
